#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Alper (U.S. Patent No 6,180,010; hereinafter "Alper '010").

Applicant has admitted that aqueous coolant/lubricant emulsions of the type recited are known (see page 1, last full paragraph of the specification). Applicant has further admitted that during use these aqueous coolant/lubricant emulsions can become contaminated with oily low HLB substances, such as grease and oil (see the paragraph bridging pages 1 and 2 of the specification).

Claims 1-12 differ from this admitted prior art by the recitation of removing the contaminants from the aqueous coolant/lubricant emulsions with a specific filtration media. Alper '010 discloses removing relatively low HLB organic contaminants from a relatively high HLB aqueous phase (see Example 2) with a filtration media of the type recited (see lines 4-8 of the abstract). It would have been obvious to one of ordinary skill in the art at the time the invention was made to purify the admittedly known aqueous coolant/lubricant emulsion with the filtration media of Alper '010, in order to enable the thus purified aqueous coolant/lubricant emulsion to be reused.

Beall (U.S. Patent No. 4,470,912) discloses purifying an aqueous emulsion with an adsorbent material.
